Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Enidae

Taxon Name: *Napaeus lowei* (Wollaston, 1878)

Assessment Information

Red List Category & Criteria: Data Deficient ver 3.1

Year Published: 2013

Date Assessed: March 28, 2011

Justification:

There is not enough information to assess the conservation status of this species. Further research is need on to clarify the population size, distribution area etc. It is therefore listed as Data Deficient (DD).

Geographic Range

Range Description:

This species is endemic to the island of Tenerife. It was described from three specimens from the mountains above St. Cruz de Tenerife. This species has probably not been found again since its description, there are no published records.

Country Occurrence:

Native: Spain (Canary Is.)

Population

There is no information available for this species.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal).

Systems: Terrestrial

Use and Trade

There is no information available for this species, however it is considered very unlikely that it is utilized.

Threats

There is no information available for this species.

Conservation Actions

There is no information available for this species.
