**Taxon Name:** *Xerotricha crispolanata* (Wollaston, 1878)

**Assessment Information**

**Red List Category & Criteria:** Data Deficient [ver 3.1](#)

**Year Published:** 2013

**Date Assessed:** March 25, 2011

**Justification:**
There is no information available on this species, it has not been found back since its description in 1878. Hence the species is listed as Data Deficient.

**Geographic Range**

**Range Description:**
This species is endemic to the island of La Palma. It was found at the Barranco de Galga.

**Country Occurrence:**
Native: Spain (Canary Is.)
Population
There are no data on the population size or trend. This species has not been found back since its description (K. Groh, pers. comm., 2011).

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)
This species is found in the lowland shrub vegetation (Piso basal).

Systems: Terrestrial

Use and Trade
This species is not used.

Threats
The threats to this species are not known, as it has not been found since its description.

Conservation Actions
More research is needed on the distribution and population of this species.
